Chantele Armant

Lead Vascular Radiologic Technologist

3 years of service

West Jefferson Medical Center

Who's inspired you in your healthcare journey?

I have received inspiration from numerous people. The first person was my sister, she is the reason I became a Radiographer. Secondly, is my senior Radiographers, who taught me to always be caring and compassionate. They also encourage me to take the teachings they have bestowed upon me and cultivate those teachings to the students that follow.

What are you most proud of in terms of contributions to healthcare?

I am most proud of the multiple modalities that I have worked on at West Jefferson Medical Center. My role as a Radiologic Technologist has spanned from Radiology to Computed Tomography to Surgery operating a C-Arm to Special Procedures. I have earned CT credentials and received my bachelor's in radiologic sciences. My focus has always been how to better care for all patients who entrust their care to me.
