## Kenya Knox-Lewis

**Family Nurse Practitioner**  
12 years of service  
New Orleans East Hospital

### **Who's inspired you in your healthcare journey?**

Several of my former supervisors and managers have inspired me to pursue my passion, which is caring for the total patient.

### **What are you most proud of in terms of contributions to healthcare?**

I'm proud of my ability to reach people where they need the most help. As an Family Nurse Practitioner, sometimes caring for patients not only involves ensuring maintenance of chronic illnesses, but it might involve listening to the patient talk about their kids, family, job or anything else that just requires a listening ear.
